On Site - References

V300 *Carefully Designed for Small Spaces*

Power Saving Design:

Power is used only around 1.1Kw/
1 Phase.

Quiet & Low Noise:

VVVF Technology, running sound is
more quiet than a cooling fan

Space Saving Design:

Pit only requires 20 cm
Overhead only requires 300 cm

Battery Drive Option

New Energy Design:

Without electricity power supply, lift can still
be used to travel around 250 floors.

Cost Saving Technology:

In time-of-use tariff of power may save cost
up to 40%

Compact & Quiet Controller:

A3 Size with customizable surface. No use of
contractor/fans/brake resistance.

**Technology used in traction drive is also included in
battery drive.*
